AEROVOLTZ = LITHIUM
PERFORMANCE FLIGHT POWER

The Aerovoltz 12 Cell EVO 2 model is the work horse of Lithium Ferrous Batteries. This is the battery you need for any two cycle engine and up four cylinders like the Rotax 912 series. This battery puts out as much power as some of the biggest lead acid batteries on the market but weighs as much as 11lbs lighter! The stock battery in most experimentals weighs 12.4lbs while the Aerovoltz 12 Cell weighs less than 2.5lbs. That's a 10 lbs saving for less than \$190 dollars! The 12 Cell Aerovoltz is housed in a custom made proprietary ABS case with hard mounted brass terminals so installation is direct replacement for the stock battery.

Dimensions 112mm x 86mm x 103mm /
4.5in x 3.5in x 3.5in
Weight 1100g/2.5 lb
Voltage (Charged) 13.6V
Amperage 20 AH PbEq
Cold Cranking Amps 410
Operating Environment -30°C (-22°F) to
60°C (140°F)

- Up to 80% smaller than the stock battery
- Up to 10lbs Lighter than the stock battery
- Service life of over twice a lead acid in similar conditions
- **Industry leading 3 year warranty**
- Designed, developed, and assembled in the USA
- Hard mounted brass terminals for a direct replacement installation
- Completely "dry" technology so batteries can be mounted in any direction
- Non-toxic, recyclable, and can be air shipped
- Applications for engines from 50cc - 1800cc
- Tested extensively by professional race teams
- Impact and water resistant
- No special charger required
- No trickle charger required, loses only 10% of charge over a year of static use
- Retail Price \$189.99 Part Number: AV012
